

TC #1: Bing search

- 1- Open a chrome browser
- 2- Go to: <https://bing.com>
- 3- Write “apple” in search box
- 4- Verify title:
Expected: apple - Search

Use `configuration.properties` for the following:

1. The browser type
2. The URL
3. The search keyword
4. Make title verification dynamic. If search value changes, title assertion should not fail.
